

SH

SLIDING SHUTTERS

Facade-mounted aluminium solar shading devices.
To be installed on facades, on mullion-transom curtain walls.

SLIDING SHUTTERS

Sliding shutters create a system of external blinds to provide solar shading.

Apart from their self-explanatory function, solar shading devices enhance the visual effect of the final structure design.

Various shapes of shutter blades and guide rails in the movable shutter system are suitable for designing individual solutions for practically all types of facade and the requirements which such shutters must meet.

Frames and profiles of sliding shutters are made of aluminium. The profiles can be fixed or movable. The system is characterised by simplicity of installation.

Variety of materials and shapes as well as diversity of colours and patterns allow the creation of facades appealing to all tastes. You can rely on a top-quality solar shading device all year round despite wind and bad weather.

Wide range of colours – RAL palette (Qualicoat 1518), texture colours, Aliplast Wood Colour Effect (wood-like colours), Aliplast Loft View – colours imitating stone surfaces (Qualideco PL-0001), anodized colour (Qualanod 1808), bi-colour.
